# HOW TO COOK WHITE RICE

---

1. Measure rice using the provided rice measuring cup. Over fill the cup slightly, then level it off at the brim of the cup for an accurate measurement.
2. Rinse measured rice in a bowl of water before adding to the inner pot. Rinse rice for 10 seconds and drain the water. Repeat this process at least 2 times, or until the water runs clear.
3. Add rinsed rice to the inner pot, filling up to the line that matches the number of cups of rice.
4. Place the pot into the rice cooker and put the lid on top.
5. Plug the power cord into a nearby 120-volt AC wall outlet.
6. Press the **COOK** switch down to turn on the indicator light and start cooking.
7. The **COOK** switch will automatically flip up to the **WARM** mode when white rice is ready.
8. Stir and fluff with the spatula before serving.
9. Unplug the power cord to turn off the rice cooker before cleaning.

## Tips

- Fill to the top of your rice measuring cup

- Rinse and drain rice to remove starch

- Look for water lines inside the pot

## Note

- **Always use the included rice measuring cup (Rice Cup) for above table**  
1 Rice Measuring Cup =  $\frac{3}{4}$  U.S. Cup (180ml)

- Before cooking, we recommend rinsing rice in a pot or bowl, not a strainer.
- To add more flavor to rice, try substituting a favorite meat or vegetable broth or stock. The ratio of broth/ stock to rice will be the same as water to rice.
- Before placing the inner pot into the cooker, check that the inner pot is dry and free of debris. Adding the inner pot when wet may damage the cooker.
- After cooking, the inner pot will be very hot. Be sure to use heat-resistant gloves or protective oven mitts to remove the inner pot from the cooker.
