IMPORTANT SAFEGUARDS

Basic safety precautions should always be followed when using electrical appliances, including the following:

1. **Important: Read all instructions carefully before first use.**
2. Do not touch hot surfaces. Use the handles or knobs.
3. Use only on a level, dry and heat-resistant surface.
4. To protect against fire, electric shock and injury to persons, do not immerse the power cord, plug or the appliance in water or any other liquid. See instructions for cleaning.
5. Close supervision is necessary when the appliance is used by or near children.
6. Unplug from the outlet when not in use and before cleaning. Allow the unit to cool before putting on or taking off parts and before cleaning the appliance.
7. Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or has been damaged in any manner. Contact Aroma® customer service for examination, repair or adjustment.
8. The use of accessory attachments not recommended by Aroma® Housewares may result in fire, electrical shock or injury.
9. Do not use outdoors.
10. Do not let the power cord touch hot surfaces or hang over the edge of a counter or table.
11. Do not place on or near a hot gas or electric burner or in a heated oven.
12. Do not use the appliance for anything other than its intended use.
13. Extreme caution must be used when moving the appliance containing rice, hot oil or other liquids.
14. Do not touch, cover or obstruct the steam vent on the top of the cooker as it is extremely hot and may cause scalding.
15. Use only with a 120V AC power outlet.
16. Always unplug from the plug gripping area. Never pull on the cord.
17. The cooker should be operated on a separate electrical circuit from other operating appliances. If the electrical circuit is overloaded with other appliances, the appliance may not operate properly.
18. Always make sure the outside of the inner pot is dry prior to use. If the inner pot is returned to the cooker when wet, it may damage or cause the product to malfunction.
19. Use extreme caution when opening the lid during or after cooking. Hot steam will escape and may cause scalding.
20. Food should not be left in the inner pot with the **Keep Warm** function on for more than 24 hours.
21. To prevent damage or deformation, do not use the inner pot on a stovetop or burner.
22. To disconnect, turn any control to OFF, then remove the plug from the wall outlet. Always attach plug to appliance first, then plug into the wall outlet.

24. Do not wrap or tie the power cord around the appliance.
25. **CAUTION:** Intended for countertop use only.

BEFORE FIRST USE

1. Read all instructions and important safeguards.
2. Remove all packaging materials and check that all items have been received in good condition.
3. Tear up all plastic bags and dispose of them properly as they can pose a risk to children.
4. Remove the nonstick inner pot from the cooker and clean with warm, soapy water.

7. Dry all parts thoroughly then assemble for use.
.....

2. Hand wash the inner pot and all accessories using warm, soapy water or place on the top rack of the dishwasher.
3. Remove the condensation collector and hand wash using warm, soapy water.
4. Wipe the cooker's body clean with a damp cloth.
5. Thoroughly dry the cooker's body and all accessories. Reassemble for next use.
.....

TROUBLESHOOTING

Rice is too dry/hard after cooking.

- Depending on how dry your rice is, add ½ to 1 cup of water and stir thoroughly. Close the lid and select the **Rice** function once more. When the cooker switches to **Keep Warm**, open the lid and stir the rice to check the consistency. Repeat as necessary until rice is soft and moist.

Rice is too moist/soggy after cooking.

- Use the serving spatula to stir the rice to redistribute the bottom (moist) part of the rice as well as release excess moisture. Close the lid and allow the cooker to remain on **Keep Warm** for 10-30 minutes as needed, opening the lid and stirring periodically to release excess moisture.

6.

Caution:

Do not use harsh abrasive cleaners, scouring pads or products that are not considered safe to use on nonstick coatings.

We recommend hand washing the inner pot with warm, soapy water to lengthen its lifespan and avoid damage over time. If washing in a dishwasher, a slight discoloration to the inner pot may occur. This is cosmetic and will not negatively affect performance.

Before placing the inner pot into the cooker, check that the inner pot is dry and free of debris. Adding the inner pot when wet may damage the cooker.

Note:

- To remove the condensation collector, squeeze both sides and pull out towards you.
- Any other servicing should be performed by Aroma® Housewares.
- Not satisfied with your Aroma® purchase? Our product experts can help! **Before returning, please contact Customer Service at 1-800-276-6286** for product support, helpful tips and more!

RICE & GRAIN

1. Using the provided rice measuring cup, add rice or grain to the inner pot.
2. For white or brown rice, rinse for 10 seconds and drain the water. Repeat this process at least 2 times, or until the water runs clear. For other grains, see the package instructions.
3. For white or brown rice, fill with water to the line that matches the number of cups of rice being cooked. For other grains, see "Rice/Grain & Water Measurement Table" on page 15.
4. Place the inner pot into the cooker and close the lid securely.
5. Plug the power cord into an available 120V AC wall outlet.
6. Press (⏻)/**Start** to turn the cooker on.

8. The cooking indicator light will illuminate and the digital display will show a chasing pattern as the cooker begins heating.
9. The digital display will count down the final 10 minutes of cook time.
10. Once the cycle has completed, the cooker will beep and automatically switch to **Keep Warm**.
11. For best results, stir the grain with the serving spatula to distribute any remaining moisture.
12. When finished, turn the cooker off by pressing (⏻)/**Start** twice and unplug the power cord.
.....

Caution:

The rice cooker will not switch to **Keep Warm** mode until all liquid has evaporated. Follow your recipe carefully and do not leave the rice cooker unattended.

Note:

- Because rice varieties may vary in their make-up, results may differ.
- Food should not be left in the cooker on **Keep Warm** for more than 24 hours.
- For best results, we recommend rinsing rice and grains in a bowl of water before cooking. Avoid using a strainer or colander, which may not be as effective in removing excess starch and may affect the final texture.

Helpful Hints:

If you misplace the measuring cup, a ¾ standard U.S. cup is an exact replacement.

To add more flavor to rice, try substituting water for a favorite meat or vegetable broth or stock. The ratio of broth/stock to rice will be the same as water to rice.

For approximate rice cooking times and suggested rice/water ratios, see "Rice/Grain & Water Measurement Table" on page 15.

7.

Helpful Hints:

Parchment paper or aluminum foil may also be used while steaming. Place the paper/foil in the center of the steam tray and ensure it does not create a seal along the bottom of the tray.

We recommend beginning to steam your foods towards the end of the rice cooking cycle. This will allow steamed food and cooked grains to be ready around the same time. See "Rice/Grain & Water Measurement Table" on page 15 for approximate cooking times.
